

Industrial Engineering Design (Mechanical) - BEng (Hons) (Degree Apprenticeship) (Part-Time)

This programme is designed to upskill existing employees who have completed level 2/3/4 study previously, either as apprentices or otherwise. Normal entry requirements to these programmes apply. This programme is offered in partnership with Wrexham University.

Entry Requirements

Entry criteria detail a typical offer but the College considers all applications on an individual basis which means that we could make offers based on qualifications, personal profile and experience. If you have any queries regarding your offer, please contact our Admissions Team.

Typical offer: 2 A Levels at E Grade or PP/PPP profile from a BTEC Level 3 qualification and five GCSEs at Grade C or above, to include English and Maths (or equivalent qualifications). Eligibility for this programme also depends on additional requirements including being a paid employee in a suitable role within the sector and working in Wales for at least 51% of working time.

Career Prospects

You may progress to a variety of postgraduate engineering related courses. Graduates have employment prospects in a wide range of engineering disciplines, for example: Advanced Manufacturing Engineering, Engineering Product Design and Development, Engineering Operations Management and Engineering Project Management.

Course Modules

Year 1 modules can include:

- Analytical Engineering Techniques
- Electrical Engineering
- Mechanical Engineering
- Work Based Learning
- Engineering Standards, Business and Operations Management

GRŴP COLEGAU **NPTC** GROUP OF COLLEGES
Datblygu Busnes
Business Development

Inspiring Learning,
Enriching Lives, Delivering Success

- Design and Computer Aided Design (CAD)

Year 2 modules can include:

- Industrial Project
- Analytical Control Techniques
- Modern Manufacture, Sustainability and Industry
- Materials and Processes
- Mechanical System Design
- Computer Aided Engineering

Year 3 modules can include:

- Project
- Managing workforce and Engagement and Commitment
- Maintenance and Safety Systems
- Engineering Modelling & Simulation
- Product Design

Assessment

The programme will include lectures, practical workshop and tutorial sessions. You will have to complete written assignments as you progress through the programme. A number of modules have exams and a research project is required.
