

Intermediate Plastering + (Part-Time)

Building on the skills learned from Plastering 101 and or Intermediate plastering, delegates will use the beginners bay and will focus on the relationship between speed and accuracy to increase overall performance and spread rate, heading towards total independence and real-world obstacles, further honing your skills with even less tutor guidance.

This course is delivered using a practical approach in professional workshops under the direction of qualified and experienced plastering experts.

Entry Requirements

Delegates are required to have a certain level of strength and fitness as dry-lining and plastering demands. E.g. to be able to work as a team of at least two to handle a bag of plaster to be able to mix it, lift plaster boards sometimes above their head and work for approximately 2 hours straight with limited breaks/downtime.

Career Prospects

Successful delegates will gain the opportunity to progress onto the Advanced Plastering course.

On successful completion of this course, delegates will receive a discount on purchasing Makita power tools from Data Power tools in Cardiff or Swansea. They will also receive a discount voucher for Marshall Town tools SB Tools online.

Course Modules

This course covers:

- Working towards consistent spread thickness
- Applying plaster to multiple walls at the same time
- Measuring the water to plaster ratio
- Mixing plaster independently with less guidance
- Working towards independence to assess a room, prepare, repair damage, tape and bead multiple surfaces.
- Wet angles, putting 2 adjacent walls on at the same time
- Skimming around light fixings and spotlight holes
- Learning to price a job in the real world
