

# Multiply: Numeracy - Money (Part-Time: e-Learning)

By the end of this lesson you will be able to understand calculations using money in different amounts and size, scales and proportions, handling statistics and using formulas.

Understanding money is important, making sure learners know how to spend it wisely and save for the future. Money skills learnt are useful for counting, budgeting and tracking where money is spent. This lesson focuses on how to calculate with sums of money and convert between currencies. Utilising key words like money, conversion, exchange rate, cost and current value learners will gain knowledge and confidence knowing they can deal with money efficiently. Topics covered include money calculations, profit, loss, exchange rate, conversion and multiple currencies. These topics along with knowledge check questions throughout the lesson helps learners use mathematics in real-life scenarios and more importantly can help set them up for future financial security.

## Entry Requirements

No entry requirements

## Career Prospects

At the end of the course you will obtain a college certificate confirming you have achieved the module - it will also enhance your ability in numeracy and support skill development for the world of work.

## Course Modules

Calculate with sums of money and convert between currencies.

## Assessment

Online test

GRŴP COLLEGAU **NPTC** GROUP OF COLLEGES
