NPORS N304 Cable Avoidance Tool (Part-Time)

The NPORS N304 Cable Avoidance Tool course provides essential training on the safe and effective use of cable avoidance tools (CAT) and signal generators (Genny). The course covers both theoretical knowledge and practical skills, including pre-operational checks, safe operation techniques, and post-operational procedures.

This course is designed for individuals who need the knowledge and practical skills to safely operate cable avoidance tools. It is suitable for candidates of all abilities, including those with no prior formal instruction.

Entry Requirements

Participants must have a good understanding of spoken and written English. For those seeking the NPORS CSCS Card, passing the CITB Health, Safety and Environment Test within the last two years is required.

Career Prospects

Upon successful completion, participants can progress to more advanced NPORS certifications or pursue relevant NVQ qualifications to upgrade their NPORS Red Trained Operators Card to a Blue Competent Operators Card.

Course Modules

This course covers:
– Industry overview and operator responsibilities
– Manufacturer’s handbook and relevant legislation
– Major components and their functions
– Pre-operational checks and safety procedures
– Safe operation techniques
– Environmental considerations
– End of shift and shutdown procedures

Assessment

Participants are assessed through a combination of theory (open questions and multiple choice) and practical tests.
